

AmbuMan® Instrument

AmbuMan

AmbuMan is the ideal training manikin for BLS CPR. It is specifically designed for the basic training of medical and nursing staff as well as lay people.

AmbuMan is designed to provide optimal training of chest compressions and demonstrate realistic respiration. The user friendly Ambu hygienic system prevents cross-infection and provides realistic airway resistance and exhalation through mouth and nose ventilation.

Monitoring Instrument

The indicator shows the instructor the volume of supplied air (in L) and the chest compression depth (in mm). Furthermore, a warning symbol is shown when a trainee is performing compressions with incorrect hand placement and when there is gastric inflation.

Carotid Pulse

The carotid pulse can be felt during chest compression and can be simulated by a manual pulse.

*Arms and legs are optionally available

KEY BENEFITS

AmbuMan Instrument

Optimal BLS manikin

Robust design

Realistic training of chest compressions

Adjustable chest stiffness

Ambu hygienic system for mouth-to-mouth and mouth-to-nose ventilation

Airways open only with correct hyperextension

Manual feedback display (ventilation volume, compression depth, hand position, and stomach inflation)

The carotid pulse can be felt during chest compressions and can also be simulated manually
